Insight

A decorative border at the top of the page featuring a variety of colorful icons representing IT and technology, including laptops, desktop monitors, power buttons, cameras, and network cables, arranged in a flowing, wave-like pattern.

Insight Client Event

Tuesday 7th September 2010 ~ 11:30 - 15:30, Manchester Central

Connect with tomorrow's technology today

The Insight Manchester Client Event is one of the UK's most comprehensive congregations of IT professionals. The 2009 event delivered an audience of just over 700 visitors giving them access to over 70 of the world's most renowned IT manufacturers in one day - under one roof!

The Insight Client Event returns to Manchester Central, (Central Hall 2) on **Tuesday 7th September 2010** for the 3rd year running and is set to be bigger than ever!

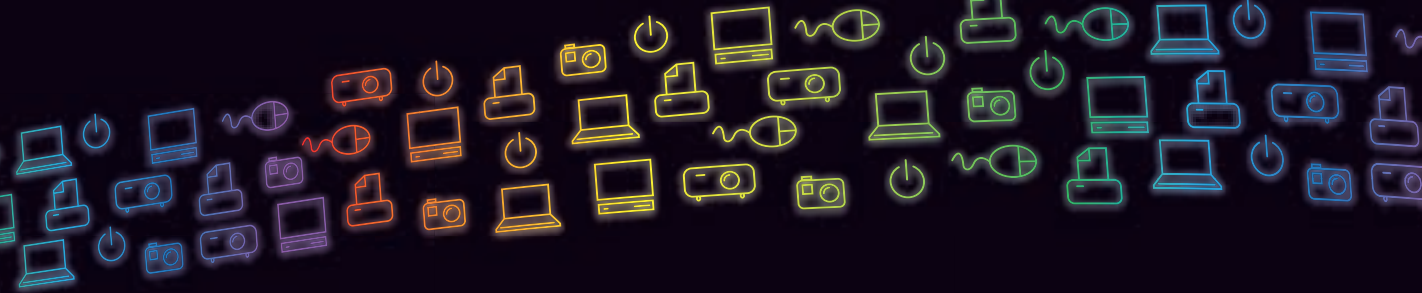

Focusing on the key issues facing the IT community, the event will offer insight into:

- » Cloud Computing
- » Networking and Communication
- » The Mobile Workforce
- » IT Security

A bright pink circular badge with a white border, containing the text '3rd Year Running!' in a white, bold, sans-serif font.

**3rd Year
Running!**

**Registration for the event is now
officially open – secure your place today!**
www.uk.insight.com/manevent2010

Why attend?

- **Attend one of the only IT Reseller Events in the North West of England**
- **New for Manchester 2010** - visit the Cloud Zone and meet with Key Cloud Computing Partners such as Google Enterprise and Microsoft to learn more about the emerging phenomenon and how it can benefit your business.
- **Attend 1 of 3 engaging keynotes** delivered by the UK's leading industry experts and analysts. Keynotes will be based around Cloud Computing, Mobility and the Consumerisation of IT.
- **Not only will you have access to over 70 of the world's most renowned IT manufacturers**, the event will give you the opportunity to learn more about the latest and most innovative technologies whilst having all your IT questions answered on the day!

**Efficient
use of your
time!**

Insight Solutions

Whether you require advice and implementation of a large scale storage consolidation, a complete technology refresh, or configuration and installation of a desktop PC, Insight delivers products, services and expert resources to address your changing technology needs.

Insight's Solutions offerings are categorised into the following key technology areas:

Lifecycle Management

Dedicated support for IT products throughout their lifecycle in the client environment, from installation through to asset disposal.

Storage

Bespoke end-to-end storage solutions delivering consolidation, data backup and recovery, and information archiving to ensure business continuity.

Server Technologies

Tailored server solutions covering full technical assessment and design through to implementation and deployment.

Your IT needs are constantly changing as your environment evolves. Insight is committed to supporting our clients through all stages of the IT lifecycle, acting as a trusted advisor to help you address your core business challenges.

Insight understands the expense caused by employee 'down time' and our services methodology revolves around business critical application availability, minimised risk and improved business continuity for our clients. With Insight, you have a trusted partner to help you optimise your IT infrastructure, aligning technology to your core business objectives.

Networking

Complete assessment, design and installation of enhanced network solutions and connectivity across single and multiple locations.

Software Services

Management of the physical, financial and contractual attributes of the software lifecycle to reduce costs, increase control and remove risk.

Off-The-Shelf

Unit-based, fixed price services that cater for a range of clients' IT needs, from notebook insurance to technical training.

Insight

Cloud Computing

What is Google Apps?

Google Apps™ offers simple, powerful communication and collaboration tools for enterprises of any size in business, education, or government – all hosted by Google to streamline setup, minimise maintenance, and reduce IT costs.

With Google Mail (including Google email security, powered by Postini), Google Calendar, and integrated IM, users can stay connected and work together with ease, even in private domains. And, using Google Docs, which include word processing, spreadsheet, and presentation tools, they can share files and collaborate in real-time, keeping versions organised and available wherever and whenever users work.

What is BPOS?

Microsoft Online Services give your business the powerful productivity capabilities of Microsoft Exchange Server, Microsoft Office SharePoint® Server, Microsoft Office Communications Server, and Microsoft Office Live Meeting hosted online - quickly, easily, and without the upfront costs of an on-premise deployment.

How it Works.

Microsoft Online Services can give you the flexibility to decide which services to have hosted and which to keep on-premise, allowing you to quickly and easily extend new capabilities to your organisation without straining your IT resources.

Suite includes:

- » Microsoft Exchange Online
- » Microsoft SharePoint Online
- » Microsoft Office Live Meeting
- » Microsoft Office Communications Online

Insight Technology Solution – Cloud Services

Insight has developed a dedicated Cloud Services Division consisting of a team of cloud computing specialists, incorporating key partners such as Google Apps and Microsoft's Online software as a service (BPOS). This division is constantly adding a portfolio of partners with the aim to enable clients from all sectors, from 5 seats through to enterprise level, to successfully adopt cloud technology.

These services range from basic set up through to customisation and management of Google Apps and BPOS to fit the needs of your organisation.

User & Administrator Support Services

Comprehensive Set Up, Implementation, Training and Support Services

Ongoing support is provided by Insight Technical Consultants directly to your administrators. For your end-users the Cloud Skills Academy is an online e-learning resource which complements the Cloud Skills training courses:

- » Telephone support direct to experienced BPOS and Google Apps Consultants.
- » Interactive support through web conferencing facilities for Administrators to assist with complex configuration or integration issues.
- » On-line e-learning resource for your end-users.

Deployment and Migration Services

Google Apps & BPOS Email Migration Service

Google Apps & BPOS Email Migration Service migrates the customer from their existing legacy mail server (e.g. Microsoft Exchange 2003, Lotus Domino, Novell Groupwise) to Google Apps & BPOS with the interactive assistance of experienced technical specialists.

The service has variants suitable for small businesses, mid-market and distributed Enterprise customers.

- » Managed transition
- » Suitability Assessment stage allows go/no go decision
- » Deployment process allowing staged transition from existing mail-server(s)
- » User training programmes
- » Ongoing support and education options

Training Services

Training and E-Learning

Cloud Skills training courses provide migration and transition assistance for your users to get the best out of BPOS and Google Apps.

- » Virtual training courses delivered by instructors using web and telephone conferencing to your users desks.
- » Short one hour sessions to maximise learning and minimise business impact.
- » Tailored courses for users migrating to the cloud

The Cloud Skills Academy is an online e-learning resource which complements the Cloud Skills training courses with self-paced learning and is an essential support resource for your end-users and helpdesk.

The fastest, most powerful MacBook Pro ever. Times three.

If you're looking for top speeds, fast graphics, and great battery life in a notebook computer, look no further than the new MacBook Pro, which is available in 13-, 15-, and 17-inch models. The 15- and 17-inch MacBook Pro feature the latest Intel Core i5 and i7 processors, which set an all-new speed benchmark for Mac notebooks. Next-generation NVIDIA graphics bring high performance to everything from pro applications to 3D games and video. And the battery keeps you on the go for up to 10 hours (8-9 hours on the 15- and 17-inch MacBook Pro).

Stay connected in high definition at any time, from anywhere

HD VideoCam supporting Skype high definition video calls

£71.99 ex VAT **ASK FOR FACN1**

Introducing FV TouchCam™ N1, a HD VideoCam with embedded H.264 codec chip and dual microphones supporting beamforming techniques, offers synchronized, crystal clear HD video (720p, 3X DVD resolution) and superior audio quality. Now, with the FV TouchCam™ N1, Skype users worldwide can enjoy HD-quality video calling, stay even more closely with friends and family or effectively discuss business partnerships across time zones.

Features:

- » HD VideoCam supporting Skype high definition video calls
- » Adaptive H.264 encoder for superb video experience
- » Autofocus wide angle lens with 78 degrees at 720p ensures that no one gets left out
- » Unidirectional dual microphones support beamforming technique for excellent audio
- » USB plug & play experience (no driver needed)

★★★★★ Price as Reviewed: £89

Facevsn TouchCam N1

Skype video conferencing along with clear audio quality

The days of videoconferencing in your pajamas are over. FaceVsn's TouchCam N1 is one of the first webcams that takes advantage of Skype's ability to make HD video calls, delivering video so crisp and smooth that it's almost as good as being there. You also get built-in noise cancellation. But is £89 too much to ask for a device that can stream yourself to co-workers and loved ones at 720p?

Considering most notebooks have built-in webcams these days, the TouchCam N1 may seem exorbitant, but if you need to see things in HD during your Skype calls, it's worth the splurge. The dual-microphone system will remove external mics from cluttered desktops, and a wide-angle lens helps squeeze in much more detail than before. Plus, the mobile set will appreciate the sturdy build quality. It's a little larger than we'd like, but the N1 is a top-notch communication tool.

FV TouchCam™ N1

Delivering video so crisp and smooth
SKYPE Certified HD 720p VideoCam

About faceVsn™

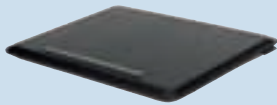

faceVsn Technology (FVT) is the global leader in pioneering solutions that empower consumers and SMEs with true-to-life HD video communications experience over public and private internet. Armed with HD codec know-how and embedded systems design expertise, faceVsn offers a full range of HD solutions including VideoCams, universal video processing units (FVexpress™), and full function set-top phones (FVfone™). Together with its partners around the world, faceVsn delivers and enhances video communications for users worldwide.

E-PROCUREMENT FOR YOUR BUSINESS DEPLOYED AT NO COST

MYINSIGHT, INSIGHT'S FEATURE RICH E-PROCUREMENT SOLUTION

More than just a website, MyInsight is specifically tailored by you to meet your needs, delivering the best online purchasing experience Insight can offer. The following features are only available through MyInsight, delivering the business-class functionality that you expect from an 'e-procurement' solution.

STREAMLINING YOUR PURCHASING PROCESS

MyInsight allows you to control what you buy and who buys it. As a business, Insight understands the purchasing process and has designed MyInsight so you can add user profiles. What does this mean? User profiles enable the right people to have access, ensuring smooth transactions or vetoing unwarranted spend. MyInsight will automate this process assisting you in controlling IT spend and managing budget.

BESPOKE ONLINE CATALOGUE

The benefits of standardising IT purchasing are well documented. Multi-site organisations often find standardised purchasing difficult to manage without heavy investment in an e-procurement solution. Not only is MyInsight deployed at NO cost but it also allows you to define the visibility your organisation has of products. If you have an agreed price structure with Insight this will be reflected when you login to MyInsight.

EMPLOYEE EMPOWERMENT IN A CONTROLLED ENVIRONMENT

If you spend time requesting quotes, stop. MyInsight will allow the respective departments and users to raise their own quotes and process these. By defining their user profiles you are able to authorise or reject the request prior to point of transaction.

DO YOU ORDER THE SAME PRODUCTS REGULARLY?

If you do, you will know how frustrating raising the same order month-on-month or week-on-week can be, that's why MyInsight allows you create custom bundles of products. If you receive a frequent request from your marketing department for toner, simply set up a bundle called 'marketing toners' and give them access to place the order - remember you will still have to sign off the order prior to transaction.

DEPLOYED FOR ALL BUSINESS CUSTOMERS AT NO COST!

Your Insight Account Manager will work with you to ensure you get the most out of MyInsight. Businesses now demand more than ever from their supplier in the drive to eliminate unnecessary costs of transacting. A convincing Return On Investment study is not required here though - MyInsight eases and manages your ordering process without touching your budget!

INFORMATION²

DELIVERING THE KNOWLEDGE ADVANTAGE THROUGH TRUSTED ADVICE

One of the greatest challenges faced by IT decision makers is obtaining the right market information at the right time when facing business critical IT issues. All major business issues can only be addressed properly and completely with a foundation of unbiased research. However, the pace of today's IT environment is an inhibitor to researching and understanding technology advancement, trends and business drivers.

The Insight Information² Programme is an information portal, featuring a selection of impartial research by Gartner and white papers by Insight UK. This research covers numerous key issues within the information technology industry and offers guidance and advice as to how they should be approached.

Information² organises information into a hierarchy of focus area, core topics and key issues, to enable members to easily navigate to information relevant to their businesses and members are also offered regular e-newsletters informing them of the latest available research and white papers.

KEY BENEFITS TO MEMBERS:

- » Enabling informed decision-making by acting as a trusted advisor
- » Vendor's research and expertise provide insight into key technology
- » Delivery of timely information based on market and technology trends

INFORMATION² IS AN EXCLUSIVE SERVICE ONLY AVAILABLE TO MYINSIGHT CUSTOMERS. LOGIN TO YOUR MYINSIGHT ACCOUNT TO GAIN ACCESS TO INFORMATION².
